

EDE Ultrasound fundraiser for The Brantford Track and Field Club

We host ultrasound training courses for doctors across Canada in Brantford Ontario.

The ultrasound scan is like those done for pregnant women and involves no harmful radiation.

We need real people for physicians to practice their skills. The scanning sessions are typically scheduled for 2 hours.

We will be scanning the abdomen and are looking for women under the age of 50 with a uterus. The first 2 sessions require the models to be younger and have a thinner body type. The remaining 2 sessions require women under 50 with an average body type. All models must have a uterus and come with a full bladder. Do not eat immediately prior to scan.

Since 2001, the EDE - ED Echo course has been taught over 800 times to over 10,000 Canadian and international physicians and allied health professionals. Its use has become the standard of care in large trauma centers, remote settings and everything in between. It has even been used in Canadian Forces combat units in Afghanistan.

EDE is the most highly rated introductory ultrasound course in North America.

Thank you for your support in helping doctors learn a valuable new skill that can save lives!

Dr. Greg Hall MD CCFP(EM) FCFP

Director

Assistant Clinical Professor McMaster University

To register for your session

Please contact Keili Imola by txt @ 519 209 4108

With your name, age, email and phone number and what session you are registering for.

Kind regards

Peggy Windle
Board member of the Brantford Track and Field Club
